Data Visualization with Power BI and Tableau

Practical – I

Roll No.:T025	Name: Afsha Amjad Mujawar
Class:TYIT	Batch:1
Date of Assignment:24-07-2026	Date/Time of Submission:24-07-2026

Curiosity Question

1. Import your own dataset into Tableau.

2. Identify appropriate Dimensions and Measures.

3. Create at least three different visualizations (e.g., bar chart, line chart, map, pie chart, scatter plot, etc.).

- Bar chart

- line chart

- Pie chart

4. Add at least one filter or interactive element to the dashboard.
5. Arrange the charts into a single interactive dashboard with a clear title.

6. Write 3–5 observations explaining the insights gained from your dashboard.

Comedy movies have the highest profitability, making them the most successful genre in terms of returns compared to other genres.

Drama is the second most profitable genre, while Romance also performs well but generates lower profitability than Comedy and Drama.

Animation, Fantasy, and Action genres contribute the least to overall profitability, indicating comparatively lower financial performance.

The profitability trend changes significantly over the years, with one year showing a sharp peak, suggesting that movies released during that period achieved exceptionally high profits.

The interactive dashboard allows users to filter and compare genres easily, making it simple to analyze profitability trends and genre-wise performance for better decision-making.
